

104

Batch Ice Cream Freezer

Features

Serve homemade, low or medium overrun ice cream, gelato, sorbet or Italian ice. Fruits, candies and nuts can be folded in as product is being drawn into your container. Product may be ejected at temperatures low enough for serving, depending on mix formulation, flavorings and overrun desired.

Freezing Cylinder

One, 3 quart (2.9 liter). Pre-charge of liquid mix determines overrun.

Automatic Timer Control

Finished product quality is automatically controlled by setting the time required for the recipe. A buzzer will sound to remind the operator to eject the finished product.

Funnel

Liquid mix and flavorings are poured into the top, using the convenient funnel provided.

Specifications

Electrical

One dedicated electrical connection is required. See the Electrical chart for the proper electrical requirements. Manufactured to be permanently connected. Consult your local Taylor distributor for cord & receptacle specifications as local codes allow.

Beater Motor

One, 1.0 HP.

Refrigeration System

One, approximately 2,500 BTU/hr. R404A.
(BTUs may vary depending on compressor used.)

Air Cooled

Minimum clearance: 6" (152 mm) around all sides. Minimum air clearances must be met to assure adequate air flow for optimum performance.

Continuing research results in steady improvements; therefore, these specifications are subject to change without notice.
