

CROWN®
SERIES

TOTALLY DIFFERENT.

Item No. _____

C903

Frozen Beverage Freezer

Two Flavor

Features

Vary your menu by offering frozen smoothies, fruit drinks, cocktails, coffees, cappuccino and tea slush beverages, all served at the desired thickness.

Totally Automatic

Fully integrated system serves high profit frozen beverages with minimal labor requirements. Just replace the bag-in-box syrup container when empty.

Programmable Control

Microprocessor touch controls are embedded in durable tempered glass panel. Controls are password protected to minimize tampering in self-service applications. Automatic defrost cycles can be programmed during slow periods. Specially designed consistency control maintains superior product quality.

Food Safety

Owner/operator defines cleaning frequency dependent on the product used (always follow your local health codes). Control notifies the operator when cleaning is required, and automatically lowers the product level to reduce waste. Water connection aids in rinsing and sanitizing operations. Equipment locks out if cleaning is not performed to assure food safety.

Visual Self-Merchandiser

Lighted, colorful graphics on front and both sides, with backlit flavor cards (sold separately), and illuminated product in two, 10 quart (9.5 liter) removable clear bowls draw customer attention. Frozen product continuously moves in the unique bullet shaped bowl to self-merchandise the product.

Automatic Fill

Peristaltic pumps automatically keep the bowls full for maximum capacity. With the water supply connected to the rear, set the control for the proper syrup to water ratio: from 4:1 to Ready to Use (RTU) or pre-mixed products.

Refrigerated Mix Cabinet

Lower refrigerated cabinet holds two, 3 gallon (11.4 liter) bag-in-box syrups or mix tanks for any pre-mixed recipe. Refrigerated to maintain mix below 41°F (5°C). Prechilled mix improves capacity.

Smart Technology

Tracks maintenance and cleaning compliance. Electronically monitors and reports product usage by bowl and day part.

Options: _____

Specifications

Electrical

One dedicated electrical connection is required. See the Electrical chart for the proper electrical requirements. Manufactured to be cord connected.

Potable Water

One, 1/4 MFL connection at rear of unit for rinsing and automatic brixing capabilities. Minimum 25 PSI for proper operation.

Refrigeration System

One, approximately 4,000 BTU/hr compressor. R404A. (BTUs may vary depending on compressor used.)

Beater Motor

Two, 1/8 HP, magnetic drive.

Air Cooled

Minimum Clearance: 3" (76 mm) at rear and 12" (305 mm) on top. (No clearance required on either side.) Minimum air clearances must be met to assure adequate air flow for optimum performance.

Refrigerated Cabinet

Interior dimensions of cabinet are:
Width: 17" (432 mm)
Depth: 12-3/8" (314 mm)
Height: 11-1/4" (286 mm)

Options

- Merchandising Graphic Translites
- Radio Frequency Identification (RFID) capability (Contact your mix supplier for availability in your area)
- Merchandising Graphic Translights

Continuing research results in steady improvements; therefore, these specifications are subject to change without notice.
